Inclusion criteria [ID14089S6F1 / F_CRIT]

Inclusion / Exclusion criteria 14089S6FC2152

Inclusion criteria

IF AT LEAST ONE IS CHECKED "NO" THE PATIENT CANNOT BE INCLUDED IN THE STUDY

ID14089S6V3 / CI1

Decision to prescribe Li as a maintenance treatment based on clinicians' assessment : ☐ [1] Yes ☐ [0] No

ID14089S6V4 / CI2

Confirmed diagnosis of BD1 according to DSM-5 criteria [based on the screening questionnaire of the Mood section of the SCID] : ☐ [1] Yes ☐ [0] No

ID14089S6V5 / CI3

Aged 18-70 years : ☐ [1] Yes ☐ [0] No

ID14089S6V6 / CI4

Able and willing to give written informed consent : ☐ [1] Yes ☐ [0] No

ID14089S6V7 / CI5

Consents to blood sample for the purpose of the RLiNK study : ☐ [1] Yes ☐ [0] No

ID14089S6V8 / CI6

Covered by a Social Security Insurance where applicable : ☐ [1] Yes ☐ [0] No ☐ [9] Not applicable

OPTIONAL

Additional inclusion criteria for the participants to the Neuroimaging module (in all centres: MRI and H+-MRS scanning and in selected centres 7Li-MRI)

ID14089S6V10 / CI7

Consents to Neuroimaging module : ☐ [1] Yes ☐ [0] No

ID14089S6V11 / CI8

Absence of contraindication of MRI scan (a specific package to screen MRI contraindications has been developed and will be made available with the information and consent forms) : ☐ [1] Yes ☐ [0] No**Additional inclusion criteria for the participants to the Actimetry module**

ID14089S6V13 / CI9

Consents to the Actimetry module and data collection : ☐ [1] Yes ☐ [0] No**Additional inclusion criteria for the participants in the Smartphone-based assessment module (enhanced adherence program and daily monitoring of symptoms and stress factors)**

ID14089S6V15 / CI10

Eligible for & consents to Smartphone-based assessment module : ☐ [1] Yes ☐ [0] No

Exclusion criteria**IF AT LEAST ONE IS CHECKED "YES" THE PATIENT CANNOT BE INCLUDED IN THE STUDY**

ID14089S6V17 / CNI1

Trial of Lithium undertaken within the last 6 months : ☐ [0] No ☐ [1] Yes

ID14089S6V18 / CNI2

Lifetime history of mood disorder better explained by a DSM-5 definition for schizoaffective disorder [If the screening question from the SCID indicates this is possible, this exclusion would be based on the outcome of the Psychosis section of the SCID] : ☐ [0] No ☐ [1] Yes

ID14089S6V19 / CNI3

Pre-lithium screening suggest that Lithium initiation is contraindicated : ☐ [0] No ☐ [1] Yes

- Incompatible concurrent treatments: long-term use of non-steroidal anti-inflammatory drug or diuretics for a known and established comorbid disorder with no possible alternative treatment (i.e. absolute contra-indication to Li treatment)
- Health issues (risk of worsening of a pre-existing condition) Psoriasis, Brugada syndrome
- Renal dysfunction: Glomerular Filtration rate below 60mL/min/1.73m2
- On-going Pregnancy or planned pregnancy on the next 2 years
- Lactating and breast feeding women (see SmPc)

ID14089S6V35 / CNI4

Participation in another research protocol that interferes with the evaluation of Lithium response (efficacy or tolerance) : ☐ [0] No ☐ [1] Yes

ID14089S6V36 / CNI5

Severe risk of self-harm at present, based on clinician's evaluation : ☐ [0] No ☐ [1] Yes

ID14089S6V37 / CNI6

Patients on Tutorship (France) or Protected adult without current capacity to consent (other countries) : ☐ [0] No ☐ [1] Yes

ID14089S6V38 / PATELIG

Patient eligible : ☐ [1] Yes ☐ [0] No

ID14089S6V55 / DATINC

Date of inclusion : ____/____/____

ID14089S6V56 / AGE

Age (calculated) : |__|_|_| years

Baseline [ID14089S6M1 / M_BL]

Participant Consent [ID14089S6F7 / F_CONS]

ID14089S6V249 / PC1_CONS

To read out: Thank you for agreeing to take part in this brief interview about alcohol, tobacco products and other drugs. I am going to ask you some questions about your experience of using these substances across your lifetime and in the past three months. These substances can be smoked, swallowed, snorted, inhaled, injected or taken in the form of pills (show drug card). Some of the substances listed may be prescribed by a doctor (like amphetamines, sedatives, pain medications). For this interview, we will not record medications that are used as prescribed by your doctor. However, if you have taken such medications for reasons other than prescription, or taken them more frequently or at higher doses than prescribed, please let me know. While we are also interested in knowing about your use of various illicit drugs, please be assured that information on such use will be treated as strictly confidential. The only time we might not keep this information completely confidential is if I am worried you are at risk to yourself and then I may tell your doctor.

Question_1**1. In your life, which of the following substances have you ever used? (NON-MEDICAL USE ONLY)**

16. Flight of Thoughts (w8) :

- ☐ [0] (0) Cohesive speech, no flight of thoughts
- ☐ [1] (1) Lively descriptions, explanations and elaborations without losing connection with the topic of conversation. The speech is still cohesive.
- ☐ [2] (2) Now and again it is difficult for the patient to stick to the topic, as the patient is distracted by random associations (often rhymes, clangs, puns, pieces of verse or music).
- ☐ [3] (3) The fine of thought is regularly disrupted by diversionary associations
- ☐ [4] (4) It is difficult or impossible to follow the patient's line of thought, as the patient constantly lumps from one topic subject to another

16. Flight of Thoughts (w3) :

- ☐ [0] (0) Cohesive speech, no flight of thoughts
- ☐ [1] (1) Lively descriptions, explanations and elaborations without losing connection with the topic of conversation. The speech is still cohesive.
- ☐ [2] (2) Now and again it is difficult for the patient to stick to the topic, as the patient is distracted by random associations (often rhymes, clangs, puns, pieces of verse or music).
- ☐ [3] (3) The fine of thought is regularly disrupted by diversionary associations
- ☐ [4] (4) It is difficult or impossible to follow the patient's line of thought, as the patient constantly lumps from one topic subject to another

To read out: Thank you for agreeing to take part in this brief interview about alcohol, tobacco products and other drugs. I am going to ask you some questions about your experience of using these substances across your lifetime and in the past three months. These substances can be smoked, swallowed, snorted, inhaled, injected or taken in the form of pills (show drug card). Some of the substances listed may be prescribed by a doctor (like amphetamines, sedatives, pain medications). For this interview, we will not record medications that are used as prescribed by your doctor. However, if you have taken such medications for reasons other than prescription, or taken them more frequently or at higher doses than prescribed, please let me know. While we are also interested in knowing about your use of various illicit drugs, please be assured that information on such use will be treated as strictly confidential. The only time we might not keep this information completely confidential is if I am worried you are at risk to yourself and then I may tell your doctor.

The criterion A is used to determine an association between clinical improvement and the treatment. The rating should apply to the period of treatment considered adequate in duration and dosage. The illness activity should be judged by frequency, severity, and duration of episodes.

ID14089S6V5183 / ALDCRITA

Criterion A :

- ☐ [10] Complete response, no recurrences in the course of adequate treatment, no residual symptoms, and full functional recovery
- ☐ [9] Very good response, no recurrences, but the patient may have minimal residual symptoms (transient anxiety, sleep disturbance, dysphoria, irritability) not requiring any intervention
- ☐ [8] Very good response. Illness activity reduced by more than 90%
- ☐ [7] Good response. Illness activity reduced by 80 - 90 %
- ☐ [6] Good response. Reduction in activity of illness by 65 - 80%
- ☐ [5] Moderate response. Reduction in illness activity by 50 - 65%
- ☐ [4] Moderate improvement. Reduction in illness activity by 35 - 50%
- ☐ [3] Mild improvement. Reduction of illness activity by 20 - 35%
- ☐ [2] Mild improvement. Reduction of illness activity by 10 - 20%
- ☐ [1] Minimal improvement. Reduction of illness activity by 0 - 10%
- ☐ [0] No change or worsening

- ☐ [0] 4 or more episodes
- ☐ [1] 2 or 3 episodes
- ☐ [2] 1 episode

ID14089S6V5186 / ALDCRTB2

B2: Frequency of episodes before the treatment :

- ☐ [0] Average to high, including rapid cycling
- ☐ [1] Low, spontaneous remissions of 3 or more years on average
- ☐ [2] 1 episode only, risk of recurrence cannot be established

ID14089S6V5187 / ALDCRTB3

B3: Duration of the treatment :

- ☐ [0] 2 or more years
- ☐ [1] 1 - 2 years
- ☐ [2] Less than 1 year

ID14089S6V5188 / ALDCRTB4

B4: Compliance during period(s) of stability :

- ☐ [0] Excellent, e.g. documented by drug levels in the therapeutic range
- ☐ [1] Good, more than 80% levels in the therapeutic range
- ☐ [2] Poor, repeatedly off treatment, less than 80% levels in the therapeutic range

ID14089S6V5189 / ALDCRTB5

B5: Use of additional medication during the period of stability :

- ☐ [0] None except infrequent sleep medication (1 per week or less); no other mood stabilizers, antidepressants or antipsychotics for control of mood symptoms
- ☐ [1] Low-dose antidepressants or antipsychotics as an "insurance", or prolonged use of sleep medication
- ☐ [2] Prolonged or systematic use of an antidepressant, anti-psychotic or anticonvulsant

Pregnancy notification form [ID14089S6M9 / M_PREGNANCY]

Pregnancy notification form [ID14089S6F16 / F_PREGNANCY]

FOLLOW-UP FORM FOR REPORTING A PREGNANCY OCCURRING IN A CLINICAL TRIAL

As soon as the investigator becomes aware of the pregnancy, this form must be duly completed, printed, signed and returned without delay to the Vigilance Unit of DRCI-Siège by fax on +33 (0)1 44 84 17 99.

Some clarifications concerning the good use of this electronic form : 1- the generation and the registration of this form generate the sending of an e-mail to the Promoter of the test: do not do tests when the study is in progress, 2- a large amount of information is copied automatically from the Inclusion form, 3- when printing the pregnancy notification form in pdf format, the information on concomitant medications comes from the electronic form "Concomitants medications " : you have to press the "Copy" button, at the tab " Tt. Conco. " of the Pregnancy module, then complete for each line the variables "Action taken" and "Causality of pregnancy", 4- to notify the monitoring of a pregnancy already notified, do not change the information completed in the initial notification form, but generate, print and fax a new form.

SAE [ID14089S6F19 / F_SAE]

FOLLOW-UP FORM FOR REPORTING AN SAE OCCURRING IN A CLINICAL TRIAL

As soon as the investigator becomes aware of the SAE, this form must be duly completed, printed, signed and returned without delay to the Vigilance Unit of DRCI-Siège by fax on +33 (0)1 44 84 17 99.

Some clarifications concerning the good use of this electronic form : 1- the generation and the registration of this form generate the sending of an e-mail to the Promoter of the test: do not do tests when the study is in progress, 2- a large amount of information is copied automatically from the Inclusion form, 3- when printing the SAE notification form in pdf format, the information on concomitant medications comes from the electronic form "Concomitants medications" : you have to press the "Copy" button, at the tab " Tt. Conco. " of the SAE module, then complete for each line the variables "Action taken" and "Causality of pregnancy", 4- to notify the monitoring of an SAE already notified, do not change the information completed in the initial notification form, but generate, print and fax a new form.
